# Growth Fund

## Fund description

The Growth Fund invests mainly in growth assets (equities and listed property), with a smaller exposure to income assets (cash and cash equivalents and fixed interest). The fund may also invest in alternative assets.

## Market Review

The fund delivered a negative return of 5.3% over the month. It was a challenging month for investors in shares, as ongoing trade tensions, a pick-up in geopolitical risk (with approaching mid-term elections in the US) and a mixed company earnings season all combined to send share markets sharply lower. In contrast, bonds delivered modest gains, benefiting from a 'flight to quality' as investors became a lot more cautious.

Our tactical positioning was detrimental to fund performance this month. We have been overweight international shares, which performed poorly, and underweight international bonds, which did well. Also holding back performance was the fund's exposure to the Australian share market, where some of its holdings in materials companies fell sharply due to weaker commodity prices and trade-related concerns.

Despite the recent falls, we believe the fundamentals for good share market performance remain in place. We are of the view that once trade tensions ease and US mid-term elections have passed, global growth should continue, albeit at a more muted pace. We retain a modest overweight position in international shares. Meanwhile, we continue to hold an underweight position in international bond markets, where returns should be limited as global interest rates move higher.

We understand that it's difficult seeing your investment fall in value. There will continue to be some 'noise' in the media and markets may remain turbulent for some time. However, we believe that maintaining good investment discipline and staying focused on your long-term goals is more important than ever.
